Contents

Foreword vii

Glasgow University Field Station at Rossdhu, Loch Lomond: the first British University Freshwater Field Station
by P.S. Maitland & J.D. Hamilton ix
An introduction to Loch Lomond
by R. Tippett xi

Section I: The physical and chemical environment of Loch Lomond and its catchment
August Thienemann and Loch Lomond – an approach to the design of a system for monitoring the state of north-temperate standing waters
by B. Moss, P. Johnes & G. Phillips 1
Geology of the Loch Lomond catchment
by J.G. MacDonald 13
Aspects of the hydrology and hydrography of Loch Lomond
by J.C. Curran & T. Poodle 21
The physico-chemical limnology of Loch Lomond
by G.A. Best & I. Traill 29
Environmental change and the chemical record in Loch Lomond sediments
by J.G. Farmer 39
Assessment of eutrophication in Loch Lomond by desk analysis
by I.D.M. Gunn, A.E. Bailey-Watts & A.A. Lyle 51

Section II: The biology and ecology of Loch Lomond and its catchment
Vegetation and land use in the Loch Lomond catchment
by G. Dickinson 53
Freshwater and wetland plant communities of Loch Lomond
by K.J. Murphy, K.D. Hudson & J. Mitchell 63
Zooplankton in Loch Lomond: perspectives, predation and powan
by P.P. Pomeroy 75
The fish community of Loch Lomond, Scotland: its history and rapidly changing status
by C.E. Adams 91
The importance of Loch Lomond National Nature Reserve for Fish
by A.A. Lyle & P.S. Maitland 103
The ecology of lampreys (Petromyzonidae) in the Loch Lomond area
by P.S. Maitland, K.H. Morris & K. East 105
Life histories of the powan, *Coregonus lavaretus* (L.) (Salmonidae, Coregoninae) of Loch Lomond and Loch Eck
by E.A.R. Brown & D.B.C. Scott 121
Elevated predation risk associated with inshore migrations of fish in a large lake, Loch Lomond, Scotland
by C.E. Adams, D.W. Brown & L. Keay 135

The ecology of the River Endrick: present status and changes since 1960
by C.R. Doughty & P.S. Maitland 139
The ecology of pelagic communities in Lochan Dubh
by R. Tippett 153

Section III: Issues affecting Loch Lomond and its catchment
Report on the discussion
by A.K. Turner 167
